University of Mississippi School of Medicine, Children s Hospital, 2500 N. State Street, Jackson, MS 39216, USA. mebeid@ped.umsmed.edu

During surgical repair of a neonatal coarctation it was recognized that this was a rare, previously undescribed form of stenosis of the entire descending thoracic aorta. A few hours after the end-to-end surgical repair, the child underwent successful balloon angioplasty, involving the entire descending thoracic aorta, and in which we intentionally avoided the surgical site.

PMID: 11146688 [PubMed - indexed for MEDLINE]
